COURSES OFFERED IN FOREIGN LANGUAGE FOR ERASMUS+ INDIVIDUAL INCOMING STUDENTS

Study program	STUDY OF PHILOSOPHY AND THEOLOGY						
Study level	MA						
Course title	ONTOLOGY						
Course code	CFT - 95475						
Learning outcomes	<p>After successfully completing the course, the student will be able to:</p> <ol style="list-style-type: none"> Define and explain the basic concepts of ontology (metaphysics) and thereby the philosophy in general, like: Being, essence, being, causality, categories, predicates, transcendentals... - <i>knowledge, understanding</i>. Distinguish and classify the problems and questions that are legitimate metaphysical i.e. philosophical from those that are not or those that are arbitrary and fictional - <i>analysis, synthesis</i>. Justify the distinctiveness and necessity of the speculative and universal (i.e. metaphysical) way of thinking, that is, approaching reality, i.e. being. This distinctiveness is reflected in the "division" i.e. the study of a specifically metaphysical structure of being like, substance - accidents, actuality - possibility, and in particular (in the study of) the constitutive core of beings, matter - form - <i>the adoption of values</i>. Defend the need for ontology (metaphysics) in relation to the positivist and technicalized approaches to the world and reality, that reject the philosophical ontology - <i>the organization of values</i>. Evaluate the contribution of philosophical tradition (notably Greek and medieval, Aristotle - Thomas Aquinas) with regard to the basic questions and problems of ontology (metaphysics) - <i>evaluation/personalization</i>. Locate the basic questions and problems of ontology (metaphysics) in the texts of philosophical classics and ecclesiastical and theological documents - <i>manipulation, precision</i>. Test and confront their own acquired knowledge on ontology (metaphysics) regarding their further study of theology, especially dogmatic theology and questions like the dogma of the Holy Trinity - <i>naturalization</i>.
